DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear as to whether the claimed "nickel" is the same or different from the nickel oxide of claim 1. Therefore, the claim is vague and indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Gandhi et al (US 4,152,299).

Gandhi teaches the application of a catalyst system to a catalyst substrate, in which the catalytic material is a perovskite compound of the formulation $\text{La}^{+3}\text{Ni}_x^{+3}\text{Ru}_{1-x}^{+3}\text{O}_3$ (col. 1, lines 57-60).

Regarding claim 2, Gandhi teaches the use of an oxide of alumina on the substrate (col. 3, line 60-col. 4, line 11).

It is noted that a catalytic material "for inducing a reaction between steam and a hydrocarbon material...to produce a hydrogen-containing gas" (applicant's claim 1) is intended use and does not further limit the claim. That being said, there is no difference seen between the claimed catalyst and that disclosed by Gandhi.
